

NUTRITIONAL SUPPLEMENTS
FOR ALL CATTLE AND SHEEP

A Specialist Approach To Livestock Mineral Supplementation

To Meet The Exacting Requirements Of Today's Industry
By Helping To Ensure Your Livestock Reach Their Genetic Potential

"Quality doesn't have to come at a high price"

PREMIER LAMB Drench – for all growing & fattening lambs to maximise growth potential

A high specification organically chelated multi-vitamin trace element supplement to help maintain micronutrient balance that effects growth & immunity in growing lambs from 6 weeks of age, helping to maximise growth & performance up to & post weaning. Results have shown significant cost benefits by reducing additional feeding. Ideal for all store & finishing lambs or stock away from home that can not be handled regularly. An ideal, easy drench supplement to use at any time when handling, routinely at 6 weeks of age with just 5ml and just prior to weaning 10ml helps to ensure stress is kept to a minimum.

PREMIER SHEEP WITH COPPER Drench – for all ewes pre - tupping / lambing

A high specification organically chelated multi-vitamin trace element supplement to help maintain micronutrient balance that effect fertility & immunity in ewes & rams. For all ewes & rams requiring additional copper Ideal supplement that is easy to drench, so stress is kept to a minimum, pre-tupping to tighten lambing and / or pre-lambing to maximise ewe & lamb performance or use at any other time when stock are not achieving their potential. Also ideal for pedigree lambs & yearlings where the higher specification & benefit of additional vitamin E is significant.

PREMIER SHEEP No COPPER Drench – as above but formulated for copper sensitive sheep

A high specification organically chelated multi-vitamin trace element supplement to help maintain micronutrient balance that effect fertility & immunity in ewes & rams. Ideal supplement that is easy to drench pre-tupping to tighten lambing and / or pre-lambing to maximise ewe & lamb performance. Where additional copper is not required. Also ideal for pedigree stock where the higher specification & benefit of additional vitamin E is significant.

PREMIER CALF Drench – for all calves under 3 months old, drench or add to milk

A high specification organically chelated multi-vitamin trace element supplement to help maintain micronutrient balance that effect growth & immunity in all young calves. Specifically formulated to help maintain health and performance, by supporting the immune system, in all young calves up to 3 months of age. Exceptionally high in selenium, E & B group vitamins.

PREMIER CATTLE Drench – for all suckler cows, growing cattle, finishing and show cattle

A high specification organically chelated multi-vitamin trace element supplement to help maintain micronutrient balance, that effect fertility by helping to improve the onset & strength of oestrus. Boosts immunity in bulls & suckler cows & their offspring. Also a great product for all growing, store and fattening cattle over 3 months of age, dairy replacements, finishing cattle as well as all show stock requiring extra bloom. Has been shown to have a calming influence on excitable cattle. Ideally use in Spring & Autumn or at dehorning weaning etc. Proven as an exceptional aid in embryo transfer programs by boosting quality and quantity of embryos

PREMIER CATTLE "easy feed" – as above but without the need to handle

As above but also available in "easy feed" formulation, just sprinkle the required dose on to silage or corn to ensure each animal is supplemented correctly without the hassle of handling and drenching.

PREMIER DAIRY - formulated to meet the requirements of the high performing dairy cow

A high specification organically chelated multi-vitamin trace element supplement to help maintain micronutrient balance that can effect fertility & immunity in all dairy cows. Specifically formulated to support cow fertility and calf viability. Developed to help maintain the onset and strength of oestrus, so often a problem seen in silage fed cows. Not getting cows in calf at the right time is often the major reason for culling. Proven as an exceptional aid in embryo transfer programs by boosting quality and quantity of embryos

"All the above products are uniquely formulated containing in excess of 22 essential elements & highly available chelates in a ready to use easy flow formula, tried tested and proven for over 10 years."

PREMIER COPPER, COBALT, SELENIUM, B1, B12 & E

A traditional liquid oral supplement of essential trace elements & vitamins for all ages & classes of livestock to help maintain trace element / vitamin levels that is both easy & economical to use. This product contains copper and should therefore only be used on sheep where a copper supplement would be beneficial. Ideal supplement where handling is easy and regular, monthly, can be mixed with many wormers.

PREMIER COBALT, SELENIUM, B1, B12 & E - as above with No Copper

PREMIER LAMB COLOSTRUM - "easy mix" for all lambs requiring extra supplementation

Dried bovine colostrums, Nucleotides, vitamins A, D3, B12 + trace elements. 32 % protein. Mix 25 ml in 100 ml of warm water per feed. Mixes easily every time for ease and speed, ideal for orphan or weak lambs.

PREMIER CALF COLOSTRUM - "easy mix" for all calves requiring extra supplementation

For all cattle that may require additional colostrum supplementation. 100% pure dried colostrum + Nucleotides, Vitamins & Trace Elements in an easy mix easy to use formulation, so important at that critical time.

PREMIER MUSCLE / JOINT paste - for use in high performing stock where extra muscle is required

Contains a unique blend of minerals, vitamins & oils, developed for all heavy muscled breeds of sheep and cattle where a weakness is identified. Particularly useful on prime stock where additional definition is required, or a weakness / deficiency resulting in poor mobility has occurred either at birth or through the animal's life.

PREMIER CALF SCOUR - for all calves suffering from a nutritional disorder

A simple but effective solution to scouring calves that risk becoming dehydrated from fluid loss. Just mix with warm water and feed individually to help stop the scour and allow rehydration. Also Contains Prebiotic for boosting good gut bacteria and Polycynol antibodies to help protect the animal from challenge. With added electrolytes.

PREMIER ROTA-CALF-RITE - an aid to maintaining the immune system

Use on all new born calves as an aid to maintaining the immune system. With the added benefit of trace elements and vitamins, supported in a high-energy carrier. Specifically formulated for all calves in the first 12 hours of life.

PREMIER HOOF SOLUTION - ideal to use as an aid to helping hoof condition

A complex blend of non-aggressive organic acids, essential oils, copper & zinc for the use as an aid in the management & maintenance of hoof hygiene in cattle & sheep to help maintain hoof condition. This product while very effective does not or cause the hoof to crack.

DRY BEDDING - for all livestock housing

A broad spectrum powdered disinfectant and ammonia neutraliser for all livestock applications. Anti-viral, antibacterial and anti-fungal disinfectant powder for cow cubicles, lambing and calf pens.

CUSTOM MIX MINERALS & FORAGE ANALYSIS - because no two farms are the same

Following detailed forage analysis, because all forage is different, coupled with your knowledge of your livestock requirements, we are able to formulate to the exact requirements of your livestock and farm.

You will often find that these formulations far more cost effective than a standard mineral "bought off the shelf" which may be good quality, but may also be providing too much of what is in excess and not enough of what is deficient. We therefore formulate using only the raw materials you require, available in free access / in feed or buckets / blocks.

OTHER PRODUCTS

We aim to develop and improve our range with exciting new products that will be beneficial to our customers & their stock.

If you have an idea or product that you would like us to develop, please contact us.

All our manufacturers are located in the UK and to ensure the very highest standards are ISO 9001: 2008, GMP & UFAS approved.

*Our Aim Is To Help Improve Livestock Performance
By Combining Our Experience & Expertise With Straightforward Practical Solutions
To Provide "Premier" Quality Products*
